

111TH CONGRESS
1ST SESSION

H. R. 1692

To amend the Consumer Product Safety Improvement Act to exempt ordinary books from the lead limit in such Act.

IN THE HOUSE OF REPRESENTATIVES

MARCH 24, 2009

Mr. FORTENBERRY introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Consumer Product Safety Improvement Act to exempt ordinary books from the lead limit in such Act.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. FINDINGS.**

4 Congress finds that—

5 (1) the Consumer Product Safety Improvement
6 Act of 2008 (CPSIA) sought to protect children
7 from the dangers associated with products con-
8 taining unreasonable levels of lead, by imposing lead
9 standards and testing requirements;

1 (2) the Consumer Product Safety Commission
2 has interpreted the Act to apply to all children's
3 books;

4 (3) the Act was not intended to apply to ordi-
5 nary books—those books that are published on
6 paper or cardboard, printed by conventional pub-
7 lishing methods, intended to be read, and lacking in-
8 herent play value;

9 (4) comprehensive testing by accredited labora-
10 tories of finished books and their component mate-
11 rials has found total lead content at levels consid-
12 ered non-detectable, or 10 ppm, well below the
13 thresholds in CPSIA;

14 (5) the book manufacturing process is now
15 standardized across the United States and much of
16 the world, does not add lead to the component mate-
17 rials, and is specialized such that the book manufac-
18 turing equipment is not generally used for other
19 types of manufacturing, avoiding the potential for
20 cross-contamination;

21 (6) the largest publishers in the United States
22 do not use lead-based chemicals or other materials
23 in the manufacturing of ordinary books, in accord-
24 ance with standards promulgated by the Coalition of
25 Northeastern Governors;

1 (7) the Centers for Disease Control and Preven-
 2 tion have determined there is minimal risk to chil-
 3 dren from lead in ordinary books;

4 (8) reading books is critical to child develop-
 5 ment and education and schools and libraries oper-
 6 ating under limited budgets provide millions of chil-
 7 dren with free access to ordinary books, and yet de-
 8 spite the lack of evidence that their books contain
 9 harmful levels of lead, libraries and other organiza-
 10 tions have to restrict access to children’s books due
 11 to the burdens and uncertainties associated with
 12 CPSIA’s new lead levels and testing requirements.

13 **SEC. 2. EXEMPTION FOR ORDINARY BOOKS.**

14 Section 101 of the Consumer Product Safety Im-
 15 provement Act (15 U.S.C. 1278a) is amended by adding
 16 at the end the following:

17 “(h) EXCLUSION FOR ORDINARY BOOKS.—

18 “(1) IN GENERAL.—The limits established
 19 under subsection (a) shall not apply to ordinary
 20 books.

21 “(2) DEFINITION OF ORDINARY BOOKS.—As
 22 used in this subsection, the term ‘ordinary books’
 23 means books published on paper or cardboard, print-

- 1 ed by conventional publishing methods, intended to
- 2 be read, and lacking inherent play value.”.
